HOW TO MEASURE YOUR WINDOW:

1. Measure the opening width inside the exterior frame casings (W). Check this dimension (W) at the top, center, and bottom of the opening. Write down the smallest dimension as "opening width".
3. Measure height (H) from A to B along outside casing. Measure both left and right sides of the opening. Write the smallest dimension as "opening height".
4. Measure height of top sash from casing to center of meeting rail (M).
5. As a check, house window glass size (GH and GW) should also be given. Top and bottom glass should be approximately the same size.

Write your opening dimensions here and bring them to Casco:

_____ X _____
OPENING WIDTH OPENING HEIGHT

STORM WINDOWS

Two Track Slider

Casco Two Track Sliding Storm Window gives any homeowner the added insulation they seek for old or new windows with adding another thermal barrier. Along with thermal improvement, weatherproofing is increased by keeping out driving rain and significant wind gusts. Product must be handed as only one of the two sash are active. Half Screen Included. (MAX SIZE: 72" x 60")

Three Track Slider

Casco's Three Track Sliding Storm Window provides all the same benefits as the two track system with added features. Both panels of this window slide in either direction and two screens are provided to compose a full screen system that is removable from the interior. (MAX SIZE: 72" x 60")

Two Track Double Hung

With increased thermal and weather resistance, Casco's Two Track Double Hung Storm Window provides new life to old windows and enhanced performance to new windows. Each window includes a bottom venting glass panel and screen. (MAX SIZE: 52" x 88")

Two Track Oriel Double Hung

For cottage style homes, unequal glass panels may be required to match a home's exterior. Casco's Oriel Storm Window as the same features as the Two Track Double Hung with the added feature of matching unequal sashes existing in the home. (MAX SIZE: 52" x 88")

Three Track Double Hung

Similar to the Casco Two Track Double Hung, the Three Track Storm Window adds an additional track for the screen. This additional feature allows the screen to be active independent of the two glass panels. (MAX SIZE: 52" x 88")

Picture Window

Complete your homes added thermal protection by adding this Picture Window Storm to your homes picture windows or basement windows for added thermal insulation. Each unit comes with a removable glass panel for easy cleaning. (MAX SIZE: 62" x 82")

Slider Window

Why choose **Casco** STORM WINDOWS?

Standard Features:

- Heavy gauge aluminum extrusions throughout
- Maintenance free finish
- Sill expander for uneven sills and drainage
- Nail fin for easy mounting
- Color matched installation screws included
- Heavy-duty finger pulls and tilt keys

Alternative to complete window replacement

Reduced home energy bills, interior drafts, condensation, sound transmission through windows

Easy removal for swift cleaning

Multiple standard color selections

Made to order, ensuring proper fit

Fast installation

All STORM WINDOWS include:

- Extruded Frame and Sashes
- Extruded Screen Frame
- Standard Fiberglass Screen
- Nail/Mounting Fin
- Sill Expander
- Clear glass
- All weather-strip
- Screw Pack
- Latches

(NOTE: Tempered glass is required on all glass units over 15 sq/ft)

All Casco Double Hung Storm Windows include a ratchet latch on the lower glass panel. This opening system allows you to select the desired amount of ventilation from 1" to full ventilation and anywhere in-between.
