

GET THOSE NICE
NEW WINDOWS
INSTALLED
PROPERLY

OR YOU MIGHT AS WELL
LEAVE THEM OPEN.

GREAT WINDOWS ALONE AREN'T ENOUGH TO PROTECT YOUR HOME AGAINST MOTHER NATURE.

SHE CAN WORK HER WAY INTO ALMOST ANYTHING. AND THAT CAN COST YOU A LOT OF MONEY.

WALL DAMAGE

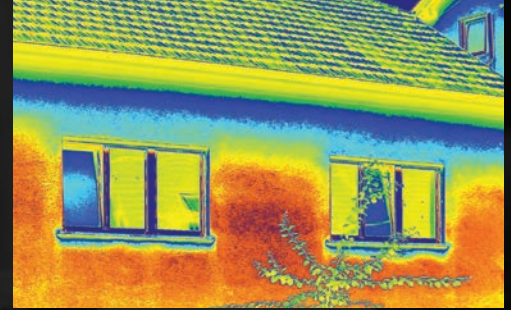

When moisture gets inside your walls, you may not even notice.

MOLD AND MILDEW

Leaking water around a window frame can cause toxic mold and harmful mildew.

ENERGY LOSS

The average home can be as much as 40% less energy efficient than a home with the windows, doors and siding properly installed.

AN OSI CERTIFIED INSTALLER CAN KEEP HER OUT.

OSI CERTIFIED INSTALLERS PROVIDE BEST-IN-CLASS WINDOW, DOOR AND SIDING INSTALLATION.

So every installation they deliver helps your home stand the test of time. And Mother Nature.

- Hours of rigorous training and 18 different courses
- Certified in the best installation products, processes and methods
- Use of the proven QUAD® Window and Door System, tested against stronger-than-hurricane-force conditions

PROTECTING HOMEOWNERS FROM THE ELEMENTS.

AND PART OF EVERY QUALITY INSTALLATION.

Developed by the leader in high-performance sealants and adhesives, OSI Certification is the only credentialing process that offers this level of protection. With input from working professionals on the jobsite, OSI has been developing industry leading sealants for more than 35 years. That's why leading window door and siding companies recommend OSI Certified Installers for their windows.
