

ALUMINUM CLAD SLIDING PATIO DOOR

door types

custom sizes & combinations

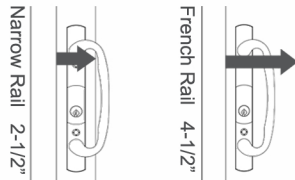

Patio doors are available in any size within a 1/16" of an inch between our minimum and maximum dimensions. Additionally, patio door units can be mullioned with other doors, transoms, or stationary panels to fill an opening or allow more light into a home.

handing

Handings are noted with "X" being an active panel and "O" as a stationary panel. Single slide doors can be modified to be handed many different ways including sliding from left to right, or from right to left. Additionally the active panel can be in the middle of a three panel door.

panel options

Sliding patio doors can have 2-1/2" or 4-1/2" wide rails which make up the sides and top and bottom of the stationary and moving panels.
